

Sue Darby

Breaking out of my mold, seeking coding projects to cut my teeth on!

sue.a.darby@gmail.com

Summary

I am seeking to break into more programming type work using the variety of languages I know and learn a few more on the way. I want to make an impact on a project. I have a variety of other skills to offer as well. I am a specialist at bridging the gap between business managers and IT professionals, among the rare group of people who can translate business needs to the IT staff and the mid to high levels of technical information to the business users. I excel at identifying execution steps, building processes and diagrams with detailed instructions for use. I am looking for opportunities in the Mat-Su Valley of Alaska or virtually working with businesses for programming, technical writing, business analysis and web development. Get to know me via www.sue-a-darby.com and my network of websites I have been working on for 15+ years. I have a variety of topics and samples spread across 8 active sites. If, as you are visiting my LinkedIn or websites, happen to think of someone you know that might have a job opportunity I might be interested in, please feel free to email me via InMail or my contact form on my sites. <http://www.sue-a-darby.com/about.html> Please do not contact me to sell me something. I am not in the market for business services. I am looking for my next career.

Projects

Professional Curriculum Vitae

January 1994 to Present

Members:Sue Darby

Website which showcases skills in web development, marketing, technical writing, programming languages, software, project planning and management as well as further details about work history.

Portfolio of Work Samples

October 2006 to Present

Members:Sue Darby

A selection of work samples. The site includes examples of UMLs, Forms, Tutorials, and Business Process snippets. <http://work-samples.sue-a-darby.com/>

Habilitation Homes Project

May 2010 to Present

Members:Sue Darby

Provider Certification has a number of different providers and even sub-contracted providers of services for those with disabilities. The sub-contractors while important were not found in the internal database and thus no one knew where the clients were being served. As a brainstorm about this issue I asked management and then IT why we could not connect these contracted homes to the provider oversight agency within the database in a similar fashion to another provider type. The ongoing project to add contracted providers to the current DS3 database system was born. It is enabling the Provider Certification & Compliance Reviewers

to conduct on site visits to ensure health and welfare of clients in habilitation settings thus maintaining compliance with Federal regulations and statutes under the Home & Community Based Waiver Program. In addition to the initial entry and connections for each contracted home, maintenance for each record is conducted as the host agency is recertified. Additionally, reports have been created to track and more easily see which homes contract with each agency or agencies. This ensures there is less fraud and Medicaid abuse.

Alaska Office Specialists

October 2009 to Present

Members:Sue Darby

Virtual Assistant Services such as Writing Blog writing Article Writing Content Writing (Minimum article length 300-500 words) Editing Business writing Creative writing Microsoft Office Letters Memos Design documents Mail merge, mailing services Reports Newsletters and management Excel data entry Access Databases Power Point Presentations Process Diagramming UML Diagramming Business Process Consulting and design Organization charts Social Media and Email Services Email Management Multiple Inboxes E-mail responses to customer inquiries Escalate only as needed Email management, sorting mail, tags Email marketing campaigns with MailChimp Website Management WordPress Website Content Management Install Wordpress Install InfiniteWP for multiple sites Configurations and setup of themes and plugins FaceBook, Twitter, Pinterest etc Technology Coaching Want to learn MS Office yourself or how to manage your WordPress site? Contact us for a coaching session. Rates vary based on topics. Any service listed can be coached .

Electronic Folder Organization

March 2014 to Present

Members:Sue Darby

Develop a standardized electronic folder system to organize notices, scanned applications and other documentation required for provider certification and compliance. Setup folders, migrate information with IT assistance to new folder system and ensure remainder of unit complies with new standards training and providing assistance and guidance as needed.

Archives

May 2008 to Present

Members:Sue Darby

Gather, categorize, folder, label and enter into a spreadsheet or database thousands of files dating back to 1996 and prepare for archiving. Oversee volunteer efforts for data entry and correctly calculate the disposition date before submitting for pick up. Recall files for records requests or other litigation as needed. Over 160 cubic feet of data has been sent off site for storage or archiving. Previously the Archive SharePoint site, built in SharePoint 2007 and converted to 2010 was not computing retention times correctly. I took the lead to work with the SharePoint Developers to update and improve the system. In the process working closely to test and deploy fixes and becoming a site admin for the test and production sites due to my knack for finding the problems or suggesting where the issue might be within the code.

Experience

Senior Services Technician at State of Alaska, Division of Senior & Disabilities, Provider Certification & Compliance

Sue Darby

Breaking out of my mold, seeking coding projects to cut my teeth on!

sue.a.darby@gmail.com

5 people have recommended Sue

"I've known Sue for years and she's the hardest working woman I've ever met. She's worked her way up from nothing to having several college degrees and several busy on-line businesses. I would highly recommend her for any position! She's been an inspiration to me and doesn't know the meaning of the words "give up"."

— **Bobbi A. Chukran**, *Owner, Grackle Stew Art Studio*, was with another company when working with Sue at Sue's Tiny Costumes

"I studied with Sue in an online class for SEO. Sue is an inspiration to me and other classmates. Working a website up to number one in the search engines is no small feat and our whole class seemed to click. That was years ago, and we are mostly all still keeping in touch. A bond of sorts was formed with that original class and I am proud to be a part of it."

— **Carla Schville**, *Owner, Carla's Angels*, studied with Sue at Cricket School

"Sue was one of my students at Charter College. She was on time and completed all of her work in a professional manner. Sue was also helpful to her fellow students."

— **Sandra Charlton-Anchorage**, *Professor, Charter College*, taught Sue at Charter College

"Sue was a bright and engaged student, who was always willing to participate and brought great insight to whatever class she was in. I had her as a student in multiple classes, and always enjoyed her presence. Her work was of the highest caliber, and her writing was always clear and well thought out. She worked well in group situations, as well as on her own. Sue would be an exceptional addition to any workplace."

— **Dr. Hillary Hodges**, *Instructor, Charter College*, taught Sue at Charter College

"I was Sue's instructor in various courses at Charter College and I have become familiar with her work through discussions with her and in analyzing her written assignments and tests. Her understanding of the course material and her ability to communicate is excellent. I am sure she is going to have an excellent career. In my view, she epitomizes the student who has high aims, intellectual ability, and the drive to succeed."

— **William Jamison**, *Instructor, Charter Collge*, taught Sue at Charter College
