Search Tool Business Document 7-2013

When we had a change of regulations in 2013, that prompted a big change in our database, which in turn broke a few things including a web based interactive search tool. This was the business document I was asked to develop upon my discovery of the broken tool. It not only fixed the issue, it added some improved functionality that the division had wanted for a couple years.

Update: The changes to the Provider Search Tool are complete and can be seen live on the Senior & Disabilities Website. Additional changes have also been made to the Submit Corrections form as well recently.
